Hi Denise,

I read through the report, and don't have any comments since it basically just lays out the data. Do you know if a call is being planned to discuss the data in reference to selecting port intervals? Also, with regard to wireline sampling in the boreholes, do you know if the data are available or will be in a format that we can compare with geophysical results? This report just shows the depths where wireline groundwater samples were collected, but not the data associated with them. Thanks.

Katie
